

Keeping your floor looking its best:

Daily

A quick vacuum or wipe over is usually all it needs to keep everyday dust and bits at bay.

Once a week (or as needed)

Give it a wipe with a damp mop or cloth, warm water, and a suitable multipurpose floor cleaner.

Occasionally

If it needs a bit more attention, use warm water and a suitable non-abrasive floor cleaner, with a soft-to-medium brush for any stubborn areas.

Our flooring is designed for everyday life, so it should feel easy to live with.

For most cleaning, warm water and a suitable multipurpose floor cleaner are all you need, used with a damp mop or cloth. If a mark needs a little more attention, use a soft-to-medium brush gently rather than heavy scrubbing.

As with all vinyl flooring, avoid bleach, solvents, abrasive cleaners or abrasive cloths. It is also best not to rub one area aggressively, especially when dry, as this may affect the surface.

A simple, sensible routine will keep your floor looking fresh.

Designed for real homes, and made to be lived with.
