

QUICK REFERENCE GUIDE FOR YOUR NEW FLOORING

We hope your new flooring makes you smile every time you step into your space.

Once laid & in place, there's just a few tips to help keeping it in tip-top shape:

SWEEP THE FLOOR

with a soft brush to clear away any dust & debris.

Vacuuming is fine but don't use anything with firm beater bars to avoid any scratching.

GO OVER WITH A CLEAN DAMP MOP

or cloth. Make sure to keep the mop clean by rinsing often with fresh, warm water.

USE A MILD DETERGENT OR DILUTED GENERAL CLEANING PRODUCT

DO NOT USE:

furniture polish, spirit-based polish, bleach or strong detergents, wire or nylon scouring pads, powder or liquid abrasive cleaners.

Installation guides are at forthefloorandmore.com/installation-guides/

Also to be aware:

- Rubber backing on doormats may result in discolouration
- Rubber feet on furniture may cause staining - use felt pads
- Look after your flooring and when using spirit-based products such as shoe polish, hair dye, permanent markers & paint, keep it away from your flooring - it will cause damage

- Be careful with bright coloured food stuffs such as mustard or turmeric as these can also stain the flooring
- By repeatedly working away at the floor surface, you may scrub away at the printed layer and cause damage

If the flooring is loose-laid and not glued to the subfloor, any damage from heavy items or sliding activities is not covered by our guarantee.
